Project Design Phase-I

Problem-Solution fit Template

Date	1ST October 2022
Team ID	PNT2022TMID36557
Project Name	University Admit Eligibility Predictor

1.CUSTOMER SEGMENTS

students can register with their personal as well as marks details for prediction the admission in colleges and the administrator can allot the seats for the students. Administrator can add the college details and he batch details

5.CUSTOMER LIMITATIONS

It may lead to wrong prediction, we have connoisseurs who shall work with you to amplify your prospects of receiving offers by ensuring that the universities you apply, do not digress from your profile, and chiefly your ambition. However, with open -source technology widely available, analytics tools are easier to access and are getting more affordable

6.AVAILABLE SOLUTIONS

Non efficient image processing algorithms were used in earlier systems. This traditional approach gives lower accuracy and is time consuming. This drawback of the existing system propelled us towards the idea for developing a system that could ease this effort.

2.PROBLEM/PAINS

Generally, as the students don't have much idea about the procedures, requirements and details of the universities in the India they seek help from the education consultancy firms to help them successfully secure admission in the universities which are best suitable for their profile, for this they have to invest huge amount of money as consultancy fees.

10.PROBLEM ROOT/CAUSE

The key lies in investing in analytics professionals that can contribute effectively to the entire process. Another concern is privacy and ownership for both students and teachers

7.BEHAVIOR

It helps student for making decision for choosing a right college. Allows students to check ever college eligibility criteria. Avoid middle man and make direct connection between Students and Universities

3.TRIGGERS TO ACT

It seems that there are no application or web application which is common for all over India for predicting the eligibility of a student for Indian university, so the proposed application will contain the eligibility criteria of all the Indian universities

9.YOUR SOLUTION

On the other hand, we have connoisseurs who shall work with you to amplify your prospects of receiving offers by ensuring that the universities you apply, do not digress from your profile, and chiefly your ambition. However, with open -source technology widely available, analytics tools are easier to access and are getting more affordable

8.CHANNELS OF BEHAVIOR

Like most areas of the educational days, technology is forcing higher institutions to do more with less. I under increasing pressure to admit retain these students, and do their student success. Facing this pressu institutions can benefit greatly fro analytics and predictive models to their goals. Predictive analytics ha colleges to better tailor their advis and personalize learning to improv outcomes as well as institutional e

4.EMOTIONS

We are going to develop a user-friendly web application. Our algorithm gives the best accuracyin identifying the o finalize your dream schools with a realistic road map, with the help of factual information coupled with a bit of reality check on your academic scores, credentials, work experience, your eminence over your peers.
